

SETHU INSTITUTE OF TECHNOLOGY

DEPARTMENT OF MECHANICAL ENGINEERING

CENTRE FOR MATERIALS RESEARCH

About the laboratory:

Materials Research laboratory conduct active research and offer consultancy services in the field of Composites material, Nano bio composite material, Natural fiber composites material

FACILITIES AVAILABLE

Servo Computerized Universal Testing Machine (25KN)

Figure shows High Temperature Tubular Furnace

Figure shows Micro Hardness Tester

Figure shows Vickers Hardness Testing Machine

Figure shows Electronic Universal Testing Machine

Consultancy and testing

Providing consultancy and services to industries/academic institutions

Ph.D, M.E., and B.E., project works related to materials.
